130-1041	Instructions, Installation	1
----------	----------------------------	---

Carefully and thoroughly read these instructions before doing the actual work of installing the parts of the Kit. To install Ventilating Screens:

1. Disconnect the Machine Service Cord and open the Cabinet Door.
2. Rotate Delivery Mechanism out of Cabinet.
3. If Merchandiser has a Cabinet Fan Assembly mounted on the Cabinet rear, remove this Fan Assembly.
4. Place the two screens furnished against the Cover Plate and within the confines of the four Studs of the Plate. The coarse mesh screen should lay between Cover Plate and fine mesh screen. See Figure.
5. Place the Studs of the Cover Plate through the four holes in the Cabinet back. Use strips of masking tape if necessary to hold Cover Plate in place.
6. From inside the Cabinet add and tighten the four Wing Nuts to the Cover Plate Studs.
7. Close the Cabinet Door and connect Service Cord.
