installed through the slotted hole A of the angle as shown in Figure 1. Make sure the Door Support Angle is seated flush in the corner between the Door Brace and the Delivery Pan before tightening the screw.

3. Using hole B in the Door Support Angle as a guide, drill a hole into the Door Brace using a 9/64" (0.140" dia.) drill bit. Take care to only drill through the Door Brace and not into the front panel of the door itself.

4. Using hole C in the Door Support Angle as a guide, drill a hole into the side of the Delivery Pan using a 11/64" (0.171" dia.) drill bit.

5. Install the Hex Head Screw through hole B into the Door Brace.

6. Install the Truss Head Screw through hole C and secure it using the nut.

INSTALLATION INSTRUCTIONS

1. Open the merchandiser door and observe the area of the door where the Door Support Angle is to be mounted. See Figure 1.
2. Remove the existing hex head screw from the Door Brace and use it to install the Door Support Angle to the Door Brace. The screw should be
