***Simple. Economical. Smart.***

*Turn a little space  
into a lot of revenue.*

It's simple. It's economical. It's smart. In other words, it's ideal for vending audiences of 100 to 200 people – even as many as 500 people. That's because the 211 Hot Beverage Merchandiser can dramatically increase sales potential by packing all these features into its reliable, space-saving size:

## 2 Different Strengths Of Coffee.

Not only does the 211 offer cup-by-cup fresh brewed coffee flavor, it does so with optional strengths regular and extra strong, depending on configuration. Your customers will also enjoy fresh brewed tea – not to mention hot chocolate, soup, and specialty-whipped hot beverages. In short, it provides the popular drink options you'll need to attract customers. And that spells increased sales potential.

## Microprocessor-Controlled Cycles.

Our microprocessor assures the accurate, timely dispensing of the desired commodities. A single microprocessor module controls the entire vend cycle, yet allows for multiple pricing. In other words, each selection can be individually priced – easily.

## Quick Recovery, High Capacity Hot Water System.

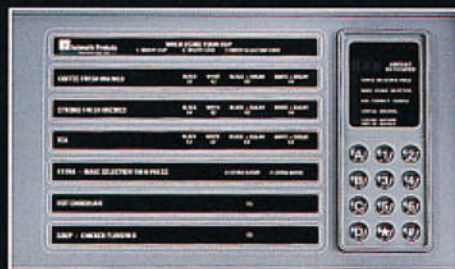

No pressure regulators, no pumps, no submerged metering devices. Just an efficient, simple, gravity water feed system that has stood the test of time. Thermostat and control switches that are lid-mounted and easily maintained.

## Model 211 Hot Beverage Merchandiser Features.

**Optional dollar bill validator** capability allows acceptance of all standard validators.

**Debit card acceptance** adds selling power by offering debit card convenience to your card-holding customers.

Easy-to-use selector panel provides your customers with all the popular drink options.

To each their own: Our cup well and optional cup sensor allow customers to use their own personal coffee cup.

Simple, efficient design helps the 211 achieve years of reliable service with simple maintenance.

**Automatic Products**  
international, ltd.

**Multiple stylings** allow you the choice of several different styling options.

**Vend meters** help you to track: 1) total vends (standard feature), 2) cash taken in, and 3) value of free vends.

**Fresh brewed tea** is now available with the 211, without sacrificing your soup capability.

**Additional coffee additive:** you have the option of replacing your soup capability with a local sugar substitute.

**Long-term reliability** helps ensure the 211 will satisfy hundreds of customers day-in and day-out. It's an excellent way to turn a little space into a long-term sales center. In fact, with simple maintenance, the 211 will give you years of customer satisfaction.

And there you have it. An affordable, reliable workhorse that can generate a lot of sales from a small space. It really is smart.
