430 Price Displays

September 14, 1999

The 430 price display board part # 430-2579 has been obsoleted and replaced by retrofit kit part # 430-2418. This newly developed kit contains the same price display board that is currently used on present production 431 Shoppertron merchandisers, as well as additional items needed to adapt to the 430 merchandiser electronics.

Once your 430 merchandiser has been upgraded with this kit than additional display board(s) part # 431-6011 can be added individually.

See attached kit listing for detailed part's breakdown; note that there is only one price display board included within the kit.
