### **B4319903**

### **431 Door Duct Cover**

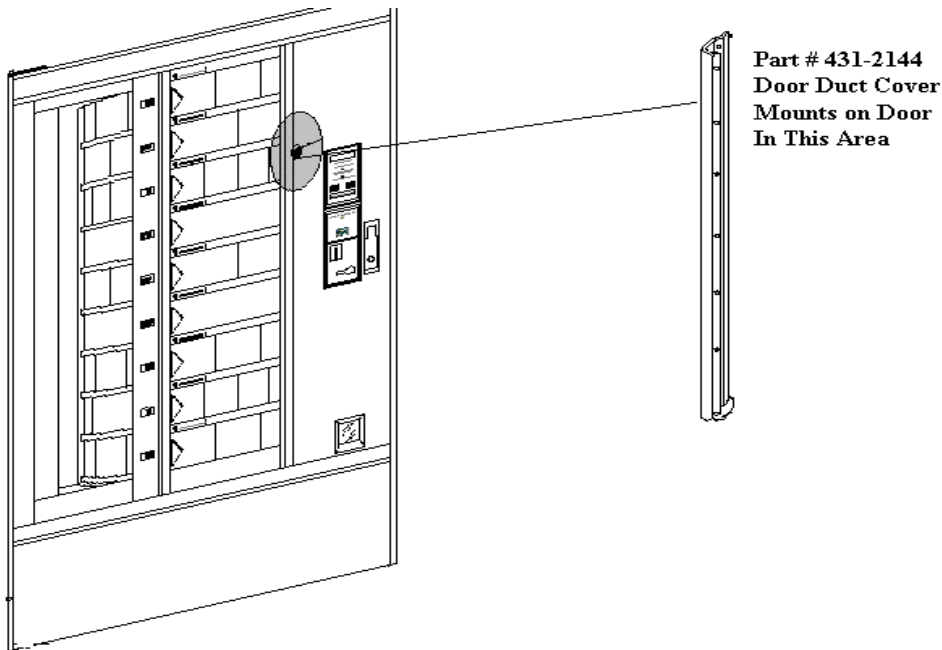

**April 8, 1999**

The door duct cover assembly has been modified on the 431 merchandiser in order to provide increased airflow across the product delivery doors. This should help to alleviate the buildup of condensation on the product delivery doors on merchandisers operating in locations of high humidity.

The new door duct cover part # is 431-2144 and is available through the National Vendors Part Department. This change is being implemented as a product improvement and is not recommended to update older merchandisers unless you are experiencing a condensation problem with the product delivery doors.

This change took effect on March 12, 1999 with the following serial numbers:

<b>431-025081</b>	<b>Domestic</b>
<b>431-083694</b>	<b>Foreign</b>
