Module Door Frame Strengthening

June 4, 1999

In a continual effort to improve product reliability the frozen and refrigerated module doors have been strengthened to prevent sagging upon door opening.

This change started with the following serial number(s):

488-080179

497-011885

785-010004

This change is being implemented as part of our ongoing product improvement process and is not a required update to older machines. If the current owner of a machine chooses to update a machine with this improvement, it is solely at their discretion. Parts are available for purchase from the National Vendor Parts Department and any labor to install or modify any existing equipment is the owner's responsibility.
