April 28, 1999

The throttling clamp used to secure the hot water tank drain hose has been revised in order to provide a more positive means of clamping the drain hose closed. The new style drain hose clamp, part # P6408154 is currently available from the National Vendors Parts Department.

**Area Of Revision
New Clamp Part
#P640-8154**

This change took effect with the following serial numbers:

Domestic	633-014862	Foreign	633-080620
	637-016168		634-080752
	364-010254		635-080236
			364-080119

The changes described in this document are recommended to be performed to machines produced prior to this starting serial number. Parts to perform these modifications are available at no cost from the National Vendors Parts Department. The cost of any labor to perform this change is the responsibility of the current machine owner.
