

BONANZA IV PRE-MIX CONSOLE DISPENSER

Narco proudly presents the most sensational — solid — concept in console pre-mix dispensers on today's market: The BONANZA IV!

The BONANZA IV console cabinet is of welded steel construction. Complete metal portion is bonderized and primed. Sides of the cabinet are finished with white baked enamel and legends are silk screened in red. Front and back of the cabinet are finished in wood grain framed in anodized aluminum trim.

OUTSTANDING OVERNITE CASUAL TEMPERATURES IN A 90° ROOM ARE DUE TO THE FACT THAT THERE IS NO JUMPER LINE BETWEEN THE END OF THE BONANZA COLD COIL AND THE INLET OF THE VALVE. THE FITTING AT THE END OF THE BONANZA COLD COIL HOOKS DIRECTLY TO THE BACK OF THE VALVE. IN ADDITION, NARCO'S SPECIAL ALUMINUM CHIP COOLING TANK IS USED WITH EXTRA LONG EVAPORATOR AND BEVERAGE TUBING COILS.
