FROZEN DRINK MERCHANDISER

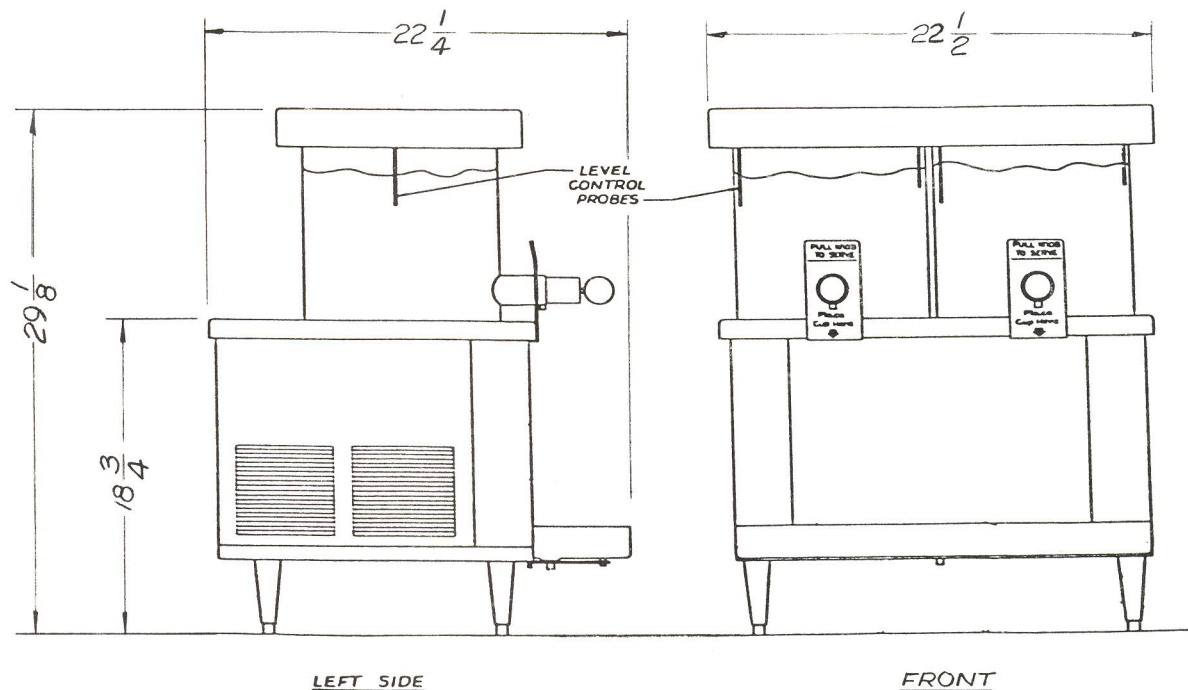

300 JACKSONVILLE ROAD

• WARMINSTER, PENNSYLVANIA 18974

• (215) 675-4200

CW 760  
COUNTERTOP UNIT

FEATURES

PRODUCT APPEAL- The frozen drink product is visual, illuminated and in motion. This presents to the customer the optimum in merchandising. In addition, there is a frosting of condensation on the product cylinders that enhances the cold, thirst-quenching appeal of the drink.

COUNTERTOP DESIGN- Attractive compact unit requires a minimum of counterspace or can be placed on a separate cabinet (optional). Ideal for self-serve operation!

AUTOMATIC SYRUP SYSTEM - No mixing. No hauling water. No carbonation to control. No squirt bottles to refill. The remote syrup system senses a drop in product level when a drink is served from either product cylinder. Automatically, it blends syrup and water in proper ratio and replenishes the product in that cylinder. Store personnel need only maintain the level in the three-gallon syrup reservoir which can be directly under the frozen drink merchandiser or twenty to thirty feet away from the merchandiser. This system guarantees the accuracy of the product mix and that the merchandiser is always full and ready to serve.
