THE NEW DNS-150 SLANT SHELF BOTTLE VENDER WITH SLENDO-TEMP ENGINEERING AND VEND-GARD PROTECTION!

The New DNS-150 may look the same, but just measure those Slendo-Temp Walls!

POLYURETHANE FOAMED-IN-PLACE INSULATION GIVES 19% INCREASE OVER FORMER DNS-126 IN CAPACITY AS WELL AS ADDED STRENGTH

Narco's DNS-150 with Slendo-Temp, thin walls feature foamed-in-place polyurethane insulation that increases inner capacity AND provides IMPROVED insulation. In addition, Narco's positive vapor-seal insulation makes for a stronger, more rigid cabinet because the foamed-in-place polyurethane insulation bonds permanently with the metal for one-wall strength.

VEND-GARD PILFERAGE-PROOF VENDING MECHANISM

Provides positive pilferage protection and smooth bottle removal ease.

BOTTLE DELIVERY MECHANISM

The DNS-150 vending slides are shaped and arranged so that only one gate's rollers can be forced between them. This prevents more than one bottle being vended at a time. When the lock bar is released (by solenoid action) any one of the gates can vend a bottle.

The complete vending mechanism may be removed from cabinet by backing off 3 front frame screws and disconnecting the vend solenoid.
