GENERAL INFORMATION

APPLICATION

This manual applies to Dr. Pepper SL5 Venders, beginning with production run 6907CB.

VENDER SAFETY PRECAUTIONS

Please read this manual in its entirety. This service information is intended to be used by a qualified service technician, who is familiar with proper and safe procedures to be followed when repairing, replacing, or adjusting any Dixie-Narco vender components. All repairs should be performed by a qualified service technician who is equipped with the proper tools and replacement components, using genuine Dixie-Narco factory parts.

Warning

REPAIRS AND/OR SERVICING ATTEMPTED BY UNQUALIFIED PERSONS CAN RESULT IN HAZARDS DEVELOPING DUE TO IMPROPER ASSEMBLY OR ADJUSTMENTS WHILE PERFORMING SUCH REPAIRS. PERSONS NOT HAVING A PROPER BACKGROUND MAY SUBJECT THEMSELVES TO THE RISK OF INJURY OR ELECTRICAL SHOCK WHICH CAN BE SERIOUS OR EVEN FATAL.

PRODUCT IDENTIFICATION

First production of DPSL5 was 6907CB.

The production date of Dixie-Narco products is determined by the date code incorporated in the serial number.

The vender serial number takes the form xxxx-yyyzzz. The last 4 digits (yyyy) identify the specific vender. The first 4 digits (xxxx) identify the manufacturing run that the vender was built in. The last two alpha characters (zz) identify the quarter and the year the vender was built. The first alpha-character identifies the quarter.

A = 1st quarter
B = 2nd quarter
C = 3rd quarter
D = 4th quarter

The second alpha-character identifies the year:

Y = 2000
Z = 2001
A = 2002
B = 2003
C = 2004
D = 2005

PHYSICAL CHARACTERISTICS

	501E
HEIGHT	72.5"
WIDTH	37.5"
DEPTH	36.0"
DEPTH WITH VALIDATOR	36.0"
SHIPPING WEIGHT	833 lbs.

INSTALLATION & SETUP

The Dixie-Narco Dr. Pepper SL5 Vender is designed utilizing the latest technology.

UNPACKING THE VENDERS

Remove the stretch wrap and top cover from the vender. Product cards are installed in the select buttons.

DO NOT STORE THE VENDER OUTSIDE WITH THE STRETCH WRAP ON. THIS COULD CAUSE THE STRETCH WRAP TO BOND TO THE VENDER'S SURFACE, WHICH COULD DAMAGE THE FINISH.

Remove the shipping boards from the bottom of the vender. The shipping boards are attached by the leveling legs. To avoid unnecessary damage to the leveling legs or base, remove the shipping boards by using a 1½" "socket type" wrench to unscrew the leveling legs. Be sure to replace the legs after removing the shipping boards.

ELECTRIC POWER NEEDED

Refer to the cabinet serial number plate to determine the proper voltage and frequency the machine requires (domestically this requirement is 115 Volts, 60 Hertz). The cabinet serial plate also indicates the Ampere rating of the vender. Single phase, alternating current is required. The vender must be plugged into a properly rated circuit with its own circuit protection (fuse/circuit breaker).

DO NOT USE AN EXTENSION CORD.

GROUND THE VENDER

The vender is equipped with a three-wire power supply cord and **MUST** be plugged in a properly grounded outlet.

DO NOT REMOVE THE GROUND PIN OR IN ANY WAY BYPASS THE GROUND OF THE VENDER.

If the outlet will not accept the power cord plug, contact an electrician to install a proper AC outlet.

Warning

FAILURE TO COMPLY WITH THESE INSTRUCTIONS MAY SUBJECT THE USER TO THE RISK OF INJURY OR ELECTRICAL SHOCK WHICH CAN BE SERIOUS OR FATAL.

PLACING THE VENDER ON LOCATION

!! CAUTION !!

DO NOT TRANSPORT THE VENDER TO OR FROM THE LOCATION LOADED WITH PRODUCT. DAMAGE TO THE VENDER MAY RESULT.

The vender must be located on a solid, flat, and level surface. The vender must be positioned close enough to an electrical outlet that an extension cord is not required. If the machine will be subject to user misuse or vandalism, it is recommended that the vender be secured to the floor or wall as described in Dixie-Narco Technical Bulletin 344. Call the Dixie-Narco Technical Service Department or your Dixie-Narco Representative for assistance.

LEVEL THE VENDER

When the vender is level, the door can be opened to any position and it will not move by itself. Open the door to several different positions before deciding the vender is level. A carpenter's level will help verify the machine is level.

Make sure that all leveling legs are in contact with the floor. If you cannot level the vender in its current location, select another location. **DO NOT** place any objects under the machine.

DANGER

THE VENDER MUST BE PROPERLY LOCATED AND LEVELED. IF THE MACHINE WILL BE SUBJECT TO USER MISUSE OR VANDALISM IT IS RECOMMENDED THAT THE VENDER BE SECURED TO THE FLOOR OR WALL AS DESCRIBED IN DIXIE-NARCO TECHNICAL BULLETIN 344 TO MINIMIZE THE RISK OF INJURY OR DEATH FROM TIPPING.. CALL THE DIXIE-NARCO TECHNICAL SERVICE DEPARTMENT OR YOUR DIXIE-NARCO REPRESENTATIVE FOR ASSISTANCE.

SPACE THE VENDER

Do not block the rear of the vender. Keep the vender 4 inches (10 mm) from the wall to ensure adequate airflow to the condenser and compressor. At the front of the vender, make sure that nothing obstructs the air intake at the bottom of the main door. At the rear of the vender, make sure nothing obstructs the air exhaust at the bottom of the cabinet.

INSTALLATION & SETUP

COIN CHANGERS & OTHER ACCESSORIES

The vender must have an MDB coin changer installed and can have an MDB bill acceptor installed. If the MDB coin changer and other MDB accessories are not factory installed, refer to the instructions received from the manufacturer of the MDB coin changer and other MDB accessories for proper set-up and installation.

The vender will support the following MDB coin changers:

Multi-Drop Coin Mech (Domestic)
Coinco 9302GX
Coinco USQ G700 Series
Conlux USLZ-101
Conlux CCM5G
Mars 4510
Mars 6512

The vender will support the following MDB bill validators:

Multi-Drop Bill Validators (Domestic)
Coinco BA30B, BA50, MAG30, MAG50
Mars VN2512, VN2502, VN2312
Conlux NBM-3120, NBU-2111-12
Ardac 5500 Series

The vender will support the following MDB card readers:

Debitek	Fage
VMC LTD	AT&T
Danyl Schlumberger	
Diebold	

LOADING CHANGE TUBES

Open the main door and enter the "Fill Coin Mech" mode in the "CASH SETTINGS" sub-menu in Programming (see Section B – Programming).

Load the coin mechanism with coins by inserting coins in the coin mech's separator. The display will show the total value of coins as they are inserted.

Note: A low coin level in the coin tubes will interfere with operation of the bill validator.

For additional information about coin mechanisms, refer to the specific manufacturer's instructions.

Loading Product

The Dr. Pepper SL5 Vender is designed to vend a wide range of cans, glass, and plastic beverage containers in sizes from 12 oz. to 24 oz.

All Dr. Pepper SL5 Venders are shipped ready to vend 20 oz. PET bottles. To vend an alternative package in the Vender, contact a Dixie-Narco Factory Service Representative or refer to the proper Technical Bulletin for shimming and set-up information.

INITIAL LOADING

To ensure proper loading, the wide column oscillator must be in the extreme left or right position. When loading the wide column, the first row of bottles should be loaded on the bottom bar of the oscillator. The second row of bottles must be loaded on the top bar of the oscillator. Always load complete rows; do not load only to the back or only to the front of the column.

The narrow column rotors must be in the "cup" position to receive the first row of bottles. When loading the narrow columns, lay the rows of bottles in the column until the column is full.

DO NOT fill the columns to the top of the cabinet. Because the bottle stack will move up and down in the column during the vend cycle, allow about 2 inches at the top of the column. Correct loading will prevent service calls and ensure proper vending.

After loading the vender for the first time, ensure the vender is loaded and working properly by test vending each selection with money until the first bottle is delivered.

NOTE: To ensure proper airflow through the evaporator, DO NOT place bottles (or other foreign) objects in the bottom of the tank.

SERVICE NOTE

Battery Backup
The SBC (Single Board Controller) is equipped with a battery backup which is used to retain information programmed in the system (pricing, time, date, etc.) in case of power interruptions or any time the main power is off. When the vender is shipped, the battery is connected and memory is being maintained.

Disconnect the battery if the vender will be stored for a long period of time. The following steps will guide you through this procedure.

- Remove power from the vender by unplugging the main power cord from the wall receptacle.
- Locate the SBC Controller on the main door. Remove the battery from its holder (B1).

SBC E-MODEL PROGRAMMING METHOD 2003

The controller has two modes of operation:
NORMAL and SERVICE.

NORMAL MODE:

In Normal Mode, on power up display will show software installed in vender, then change to Ice Cold Drink message, Sold Out, Credit Value, or decimal point. If decimal is flashing, this indicates an error or problem recognized in the vender. When money is inserted, the display indicates the total amount of the deposit. The select buttons are used to select the product. In normal mode you may access an external menu for reading historical sales total, product total, product total by selection, and sales by price totals.

SERVICE MODE:

The Service Mode is entered when the vender inner door is open and the service switch is pressed. The display will show a list of error codes for errors that have occurred since the door was last opened. "**JC-#**" is a vend mechanism jammed, "**SS-#**" is a select switch problem, "**RFRG**" is a refrigeration or temp sensor problem, and "**DS**" is a door switch open problem. To acknowledge an error, press any select button, at this time you will enter the menu. The display will show "**HD**" - Historical Data - at this time. Some of the menu items have sub-menus. To move through the menus and sub-menus follow these instructions. To:

- MOVE THROUGH MENU:** Press select buttons 1 & 2 simultaneously to scroll down through the menu. While scrolling down through menu, release, press select buttons 1 & 2 simultaneously to scroll up through menu.
- ENTER SUB-MENU:** Press and hold select button 1 to enter a sub-menu.
- EXIT SUB-MENU:** With "**RTN**" - Return" on display, press and hold select button 1 to exit a sub-menu.
- EXIT SERVICE MODE:** Closing the inner door or a five-minute inactivity time-out will exit the service mode.

FRONT PANEL PROGRAMMING SERVICE MENU

HD - Historical Data

This function shows the user the vender accounting over the life of the vender. Use the following select buttons to view the total sales in dollars, total number of vends and the total number of vends for each selection.

- Press Select Button 1: Shows the historical total cash sales for the life of the vender.
- Press Select Button 2: Shows the historical total number of vends.
- Press Select Button 3: Shows the historical number of vends by selection. Each selection automatically scrolls across the display.
- Press & hold select buttons 1 & 2 simultaneously to move to the next item on the menu.

PROGRAMMING

RD - Interval Data

This function shows the user the vender accounting data since the time of the last counter reset. This data can be reset either from this menu or by a DEX interrogation.

Press Select Button 1: Shows the total cash collected since the last counter reset.

Press Select Button 2: Shows the total number of vends since the last counter reset.

Press Select Button 3: Shows the total number of vends by selection since the last counter reset. Each selection automatically scrolls across the display.

Press Select Button 4: This button zeros the resettable data described above. Hold select button "4" for 5 seconds and "C RS" - COUNTERS RESET will be displayed. At this time, all resettable data will return to "0".

Press & hold select buttons 1 & 2 simultaneously to move to the next item on the menu.

SP - Set Price

This function is used to set the price of each selection. When a select button is pressed, the price for that selection will be displayed. If the button is held in, the price will increment or decrement. To change from increment to decrement, release the select button and press it again. To set all selections for the same price: set desired vend price on select button #1, then simultaneously press and hold select buttons 3 & 4 for five seconds, the display will show "SPS" - Single Price Set, this will change the vend price of all selections, both primary and secondary, to the price programmed to select button #1.

Note: The SBC's multi-pricing capability allows you to set all selections to any price in the range of \$0.00 to \$99.95.

Press & hold select buttons 1 & 2 simultaneously to move to the next item on the menu.

C-S - Cash Settings

CF - Fill Coin Mech:

This function is used to count coins loaded in the top (separator) of the coin mech. Press select button 1 will enter "CF" - Fill Coin Mech. Insert coins in the top (separator) of the coin mech. The total value of the coins will be displayed and will be counted in the DEX audit data, so the SBC controller knows exactly how much change is in the coin mech.

Press & hold select buttons 1 & 2 simultaneously to move to the next item on the menu.

C-D - Dump Coin Mech:

This function is used to dump coins from the coin mechanism while in "CD" - Dump Coin Mech mode.

Press select button 1 to enter mode and the lowest coin value dispensable will show on the display. Press and hold select buttons 1 & 2 simultaneously to scroll through the different coin values available to dump coins. Press and hold select button 1 to dump the coins whose value is shown on the display. Press and hold select buttons 1 & 2 simultaneously until "RTN" shows on the display. Press select button 1 will return to "CD".

CR - Coin Rules:

This function is used to allow the exact change condition to be turned on or off. When turned off, the controller will not go in the exact change condition. This will allow bills or coins to be accepted regardless of the tube level status of the coin mech. When turned on, the controller will set the exact change condition based on the ability to pay back non-refundable currency. (Coins, paper). To show current condition press select button 1. Press and hold select button 1 to toggle "CR" on and off.

ESC - Escrow:

This function supports 4 (four) escrow options. Press select button 1 will enter mode and show current escrow setting. Press and hold select button 1 will scroll through available Escrow options and set the escrow mode to the setting displayed when select button 1 is released.

PR – Escrow to Price

The escrow condition is forced vend option 1("escrow to price"). All dollar bills will be stacked. No cancel sale is allowed once minimum vend price is met or exceeded.

EP 2 – Escrow No Cancel

PROGRAMMING

The escrow condition is forced vend option 2 ("escrow no cancel") with all bills stacked, and no cancel sale allowed unless the vender is in exact change and the maximum vend price is exceeded. Note: Any money entered below the vend price cannot be returned

ES 4 – Escrow to Select 4

The escrow condition is "escrow to select" with all dollar bills being stacked. Cancel sale will return the deposit from the coin changer (i.e. 4 quarters).

ES 1 – Escrow to Select 1

The escrow condition is "escrow to select dollar bills" with the last dollar bill that meets or exceeds maximum vend price being escrowed in the validator. Cancel sale will return the held dollar bill and any amount over \$1 will be returned from the coin changer.

Press & hold select buttons 1 & 2 simultaneously to move to the next item on the menu.

MV – Multi Vend:

This function, when turned on, allows credit to be retained after a vend so the customer can vend from another selection. (i.e. .50¢ vend price, put in \$1.00, push a select button and vends, 50¢ still shows on display, push a second selection button and vends). Credit is cancelled after 5 minutes of inactivity. There is unlimited acceptance. If a customer wants their credit (money) back, the coin return lever must be pressed. To show current "MV" condition, press select button 1 and the display will show the current setting. Press and hold Select Button 1 to toggle "MV" from on and off.

Press and hold Select Buttons 1 and 2 simultaneously to move to the next item on the menu.

RTN - Return:

This function is used to return to "C-S" – Cash Settings.

Press and hold select buttons 1 & 2 simultaneously to move to the next item on the menu.

USER - User Menu

This function is used to configure the vender to operate in the fashion best suited for the vender location. To move to "DIAG" - Diagnostics, press & hold select buttons 1 & 2 simultaneously, to enter the USER sub-menus press select button 1. The following are sub-menus of the User Menu: "STS" - Space To Sales, "Time", "LANG" - Language, "ECNT" - Electronic Counter, "LIM" - Limited Access, "SEC" - Secondary Price, "ECTL" - Environmental Controls, "LT" - Light, "RFRG" - Refrigeration, "FREE" - Free Vend, "OVER" - Override, "SSM" - Sales Message, "R-CH" - Recharge, and "RTN" - Return.

STS - Space To Sales

To view the space to sales condition, press select button 1 and display will show "SEL 1" – Selection 1 alternating with columns assigned to that select button. Press select buttons 1 & 2 simultaneously to scroll through the available select buttons to view columns assigned and "Return".

To change space to sales:

Press select button 1 at the, "SEL #" prompt and "CL## #" (column edit routine) will be displayed, where the ## is the first column to be added or deleted to the select button and the third # is "0" for not assigned or "1" for assigned to that selection. Press select button 1 with the "CL## #" on the display to toggle between "CL## 0" and "CL## 1". With the setting you wish to use showing on the display press select buttons 1 & 2 to scroll to next selection to add/delete columns or "RTN". Press select button 1 at the "RTN" prompt will return to "STS".

Press & hold select buttons 1 & 2 simultaneously to move to the next item on the menu.

Time

This function is used to set the year, month, day, hour/minute (military 24 hour clock), and daylight savings time. Press select button 1 and "YEAR" will show on display. Press select buttons 1 and 2 simultaneously to scroll through all "Time" sub-menus.

"YEAR" - Year Setting (00 to 99)

Press select button 1 the current year setting will show on display.

Press and hold select button 1 to increment the year setting (2000 to 2099). Release select button 1 and press and hold again will decrement the year setting.

Release the select button with the display showing the year you wish to use and display will return to "Year".

PROGRAMMING

Press select buttons 1 & 2 simultaneously to scroll to "Month".

"MTH" - Month Setting (01 to 12)

Press select button 1 and the current 2-digit month setting will show on display.

Press and hold select button 1 to scroll through the month settings. (01–Jan. to 12–Dec.).

Release the select button with the display showing the month you wish to use and display will return to "Month".

Press select buttons 1 & 2 simultaneously to scroll to "Day".

"DAY" - Day of Month Setting (1 to 31)

Press select button 1 and the current 2-digit day of month setting will show on display.

Press and hold select button 1 to scroll through the day of month settings (1 to 31). Release select button 1 and press and hold again will decrement the day of month setting.

Release the select button with the display showing the day of month setting you wish to use and display will return to "Day".

Press select buttons 1 & 2 simultaneously to scroll to "Hour/Minute".

"HR/M" - Hour and Minute Setting (0000 to 2359)

Press select button 1 and the current 4-digit hour and minute setting will be displayed (24 hour).

Press and hold select button 1: Set Hours

Press and hold select button 2: Set Minutes

Press select buttons 1 & 2 simultaneously to scroll to "Daylight Savings Time".

"DST" - Daylight Saving Time Setting

Press select button 1 and the current setting will show on the display.

Press and hold select button 1 to scroll through the "Daylight Savings Time" options listed:

"**AMER**" - North American rules - Set forward 1 hour at 2:00 am on the first Sunday in April; Set backward 1 hour at 2:00 am on the last Sunday in October.

"**EURO**" - European rules - Set forward 1 hour at 1:00 am on the last Sunday in March; Set backward 1 hour at 1:00 am on the last Sunday in October.

"**AUST**" - Australian rules - Set forward 1 hour at 1:00 am on the first Sunday in October; Set backward 1 hour at 1:00 am on the last Sunday in March.

"**OFF**" - Off Rules - Daylight savings time changes will not be made.

Release the select button with the display showing the "Daylight Savings Time" setting you wish to use and display will return to "Daylight Savings Time".

Press & hold select buttons 1 & 2 simultaneously to move to "Return".

Press select button 1 to move to "Time".

LANG - Language

This function is used to set the language that will be used for display messages. To display the current language selected, press select button 1. To change the language selected, press & hold select button 1 to scroll through the language menu. Once the desired language is shown on the display, release the button. The display will then return to "Language".

ENGL	English	SPN	Spanish
FRN	French	SLOV	Slovene
GERM	German	FINN	Finnish
ITA	Italian	NOR	Norwegian
PORT	Portuguese		

Press and hold select buttons 1 & 2 simultaneously to move to the next item on the menu.

ECNT - Electronic Counter

This function is used to show historical cash sales, historical total vends, historical product counts by selection, and historical product counts that have occurred for prices being used from outside the vender. Press select button 1 to view the current four (4) button code. To view the data the four button code must be entered. Once entered the listed menus are available from the front of the vender;

Press select button 1: Show historical cash sales.

Press select button 2: Show historical total vends.

Press select button 3: Show historical product counts by selection.

Press select button 4: Show list of prices and historical product counts that have occurred for those prices.

Press select button 5: Returns to sales idle mode (normal vender operation).

To change "ECNT" four button code:

At "ECNT" press select button 1, "####" (representing current four button code) will show on display. Press and hold select button 1 until the far left digit starts blinking indicating it can be changed. Press the select button which is desired for the code. The next digit will start blinking, press the select button which is desired for the code. Continue this process until all 4 digits are set. Note: The four-button code must use select buttons 1 through 9 only.

Note: There is a thirty (30) second time-out that will return the vender to normal vending mode.

Press & hold select buttons 1 & 2 simultaneously to move to the next item on the menu.

LIM - Limited Access

This function is used to program the vender to use the Limited Access Features. To move to Secondary Price Menu, press & hold select buttons 1 & 2 simultaneously, to enter the sub-menu press select button 1. The following are sub-menus of Limited Access Menu: "LAOS" - Selects, "Days", "STR1" - Start 1, "STP1" - Stop 1, "STR2" - Start 2, "STP2" - Stop 2, and "RTN".

LAOS - Selects

This function is used to set selection(s), which, will be limited during certain periods of the day. To view the selection setting condition, press select button 1. The display will show "SEL 1 - # where # is a "0" or "1" depending on whether the selection is enabled (1) or disabled (0). Press and hold select button 1 to toggle between "0" & "1". Press select buttons 1 & 2 simultaneously to scroll through all available select buttons, "NONE", "ALL", and "RTN". Pressing select button 1 when "ALL" or "NONE" are displayed will cause the display to flash momentarily. Press select button 1 at the "RTN" prompt returns to "LAOS".

Press & hold select buttons 1 & 2 simultaneously to move to the next item on the menu.

Days

This function is used to set the days of the week to be affected by limited access.

Display will show:

Day of Week:	SUN - Sunday	WED - Wednesday	SAT - Saturday
	MON - Monday	THUR - Thursday	ALL - All Days
	TUE - Tuesday	FRI - Friday	NONE - No Days
	RTN - Return		

Press select button 1 and "MON #" will show on the display, where # is "0" (disable) or "1" (enable). Press and hold select button 1 to toggle between "0" and "1". Release the select button with the display showing the setting you wish to use. Press select buttons 1 & 2 simultaneously to scroll through all available days, "ALL", "NONE", and "RTN". Press select button 1 at the "Return" prompt returns to "Days".

Press & hold select buttons 1 & 2 simultaneously to move to the next item on the menu.

STR1 - Start 1

This function is used to set the hours and minutes to start period 1 limited access.

PROGRAMMING

Press select button 1 and the current four digit hour and minute setting will be displayed (24 hour).

Press and hold select button 1 to Set Hours.

Press and hold select button 2 to Set Minutes.

Press and hold select buttons 1 & 2 to simultaneously to move to the next item on the menu.

STP1 - Stop 1

This function is used to set the hours and minutes to stop period 1 limited access.

Press select button 1 and the current four digit hour and minute setting will be displayed (24 hour).

Press and hold select button 1 to Set Hours.

Press and hold select button 2 to Set Minutes.

Press and hold select buttons 1 & 2 to simultaneously to move to the next item on the menu.

STR2 - Start 2

This function is used to set the hours and minutes to start period 2 limited access.

Press select button 1 and the current four digit hour and minute setting will be displayed (24 hour).

Press and hold select button 1 to Set Hours.

Press and hold select button 2 to Set Minutes.

Press and hold select buttons 1 & 2 to simultaneously to move to the next item on the menu.

STP2 - Stop 2

This function is used to set the hours and minutes to stop period 2 limited access.

Press select button 1 and the current four digit hour and minute setting will be displayed (24 hour).

Press and hold select button 1 to Set Hours.

Press and hold select button 2 to Set Minutes.

Press and hold select buttons 1 & 2 to simultaneously to move to the next item on the menu.

RTN - Return

Press select button 1 to return to "LAOS".

Press & hold select buttons 1 & 2 simultaneously to move to the next item on the menu.

SEC - Secondary Price

This function is used to program a second price for each selection. To enter the sub-menu press select button 1. The following are sub-menus of Secondary Price Menu: "S-P2", "Days", "STRT", "STOP", and "RTN". Press select button 1 at "Return" to return to "SEC".

S-P2 - Price

This function is used to set the price of each selection. When a select button is pressed, the price for that selection will be displayed. If the button is held in, the price will increment or decrement. To change from increment to decrement, release the select button and press it again. Note: The SBC multi-pricing capability allows you to set all selections to any price in the range of \$0.00 to \$99.95.

Press & hold select buttons 1 & 2 simultaneously to move to the next item on the menu.

DAYS - Days

This function is used to set the days of the week to be affected by secondary pricing.

Day of Week:	SUN - Sunday	WED - Wednesday	SAT - Saturday
	MON - Monday	THUR - Thursday	ALL - All Days
	TUE - Tuesday	FRI - Friday	NONE - No Days
	RTN - Return		

Press select button 1 and "MON #" will show on the display, where # is "0" (disable) or "1" (enable). Press and hold select button 1 to toggle between "0" and "1". Release the select button with the display showing the setting you wish to use. Press select buttons 1 & 2 simultaneously to scroll through available days, "ALL", "NONE", and "RTN". Press select button 1 at the "RTN" prompt returns to "DAYS".

Press & hold select buttons 1 & 2 simultaneously to move to the next item on the menu.

PROGRAMMING

STRT - Start

This function is used to set the hours and minutes to start secondary pricing.

Press select button 1 and the current four digit hour and minute setting will be displayed (24 hour).

Press and hold select button 1 to Set Hours.

Press and hold select button 2 to Set Minutes.

Press and hold select buttons 1 & 2 to simultaneously to move to the next item on the menu.

STOP - Stop

This function is used to set the hours and minutes to stop secondary pricing.

Press select button 1 and the current four digit hour and minute setting will be displayed (24 hour).

Press and hold select button 1 to Set Hours.

Press and hold select button 2 to Set Minutes.

Press and hold select buttons 1 & 2 to simultaneously to move to the next item on the menu.

RTN - Return

Press select button 1 to return to "SEC".

Press & hold select buttons 1 & 2 simultaneously to move to the next item on the menu.

ECTL – ENVIRONMENTAL CONTROLS

This allows the user to view the energy conservation menu "LT" - "Lighting", "RFRG" – "Refrigeration", and also the "RLY" - Relay test menu. When this is programmed to "Off" you will not see (LT), (RFRG) or (RLY). Press select button 1 and the current setting will be displayed (On or Off). Press and hold select button 1 to toggle between on and off. To move to "LT" Light, press & hold select buttons 1 & 2 simultaneously with this feature on. To move to "FREE" - Free Vend, press & hold select buttons 1 & 2 simultaneously with this feature off.

LT – Light: available only when Environmental Controls are set to on.

This function is used to turn the lights off and on during certain periods of the day.

Press select button 1 will enter "DAYS".

DAYS - Days

This function is used to set the days of the week to turn lights on and off.

Day of Week:	SUN - Sunday	WED - Wednesday	SAT – Saturday
	MON - Monday	THUR - Thursday	ALL - All Days
	TUE – Tuesday	FRI – Friday	NONE – No Days
	RTN - Return		

Press select button 1 and "MON #" will show on the display, where # is "0" (disable) or "1" (enable). Press and hold select button 1 to toggle between "0" and "1". Release the select button with the display showing the setting you wish to use. Press select buttons 1 & 2 simultaneously to scroll through all available days, "ALL", "NONE", and "RTN". Press select button 1 at the "RTN" prompt returns to "DAYS".

Press & hold select buttons 1 & 2 simultaneously to move to the next item on the menu.

STRT - Start

This function is used to set the hours and minutes to start lighting routine.

Press select button 1 and the current four digit hour and minute setting will be displayed (24 hour).

Press and hold select button 1 to Set Hours.

Press and hold select button 2 to Set Minutes.

Press and hold select buttons 1 & 2 to simultaneously to move to the next item on the menu.

STOP - Stop

This function is used to set the hours and minutes to stop lighting routine.

Press select button 1 and the current four digit hour and minute setting will be displayed (24 hour).

Press and hold select button 1 to Set Hours.

Press and hold select button 2 to Set Minutes.

Press and hold select buttons 1 & 2 to simultaneously to move to the next item on the menu.

PROGRAMMING

ENAB - Enable

This function is used to allow the lighting routine to go in to affect.

Press select button 1 and the current setting will be displayed (On or Off).

Press and hold select button 1 to toggle between "On" and "Off".

Release the select button showing the setting you wish to use and display will return to "ENAB".

Press select buttons 1 & 2 to scroll to "RTN".

RTN - Return

Press select button 1 to return to "LT".

Press & hold select buttons 1 & 2 simultaneously to move to the next item on the menu.

RFRG – Refrigeration: available only when Environmental Controls are set to on.

This function is used to electronically control the refrigeration operations of the vender if an electronic temp sensor is being used. Press select button 1 will enter "TEMP".

TEMP – Temperature (Default Temperature 35⁰F / 1.5⁰ C)

This function is used to set the average product temperature for initial pull down and reload recovery.

Press select button 1 and "tt.tx" will show on the display where x is F (Fahrenheit) or C (Celsius) and tt.t is the degrees.

Press and hold select button 1 to increase or decrease the number by 1 F⁰ or 0.5⁰C. Release select button with the display showing the temperature you wish to use and display will return to "TEMP".

Press select buttons 1 & 2 to scroll to "Celsius or Fahrenheit".

C-F - Celsius or Fahrenheit

This function is used to set the degree reading to Fahrenheit (F) or Celsius (C).

Press select button 1 and the current setting will show on the display. Press and hold select button 1 to toggle between F and C. Release the select button with the display showing the setting you wish to use and display will return to "Celsius or Fahrenheit".

Press select buttons 1 & 2 to scroll to "DSP".

DSP - Display

This function is used to enable the Temperature to be displayed following the "Ice Cold Drink" message.

Press select button 1 and "DSP" will show on the display. Press select button 1 and the current setting will be displayed (On or Off). Press and hold select button 1 to toggle between "On" and "Off".

Press & hold select buttons 1 & 2 simultaneously to move to the next item on the menu.

DAYS - DAYS

This function is used to set the days of the week to use Temperature Setting Routine.

Day of Week:	SUN - Sunday	WED - Wednesday	SAT – Saturday
	MON - Monday	THUR - Thursday	ALL - All Days
	TUE - Tuesday	FRI – Friday	NONE – No Days
	RTN - Return		

Press select button 1 and "MON #" will show on the display, where # is "0" (disable) or "1" (enable). Press and hold select button 1 to toggle between "0" and "1". Release the select button with the display showing the setting you wish to use. Press select buttons 1 & 2 simultaneously to scroll through all available days, "ALL", "NONE", and "RTN". Press select button 1 at the "RTN" prompt returns to "DAYS".

Press & hold select buttons 1 & 2 simultaneously to move to the next item on the menu.

STRT - Start

This function is used to set the hours and minutes for storage temperature to become active.

Press select button 1 and the current four digit hour and minute setting will be displayed (24 hour).

Press and hold select button 1 to Set Hours.

Press and hold select button 2 to Set Minutes.

Press and hold select buttons 1 & 2 to simultaneously to move to the next item on the menu.

PROGRAMMING

STOP - Stop

This function is used to set the hours and minutes for storage temperature to de-activate.
Press select button 1 and the current four digit hour and minute setting will be displayed (24 hour).
Press and hold select button 1 to Set Hours.
Press and hold select button 2 to Set Minutes.

Press and hold select buttons 1 & 2 to simultaneously to move to the next item on the menu.

S-T – Storage Temperature: (Default Temperature 60⁰F / 16⁰ C)

This function is used to set the temperature for product storage.
Press select button 1 and “tt.tx” will show on the display where x is F (Fahrenheit) or C (Celsius) and tt.t is the degrees.
Press and hold select button 1 to increase or decrease the number by 1 F⁰ or 0.5⁰C. Release select button with the display showing the temperature you wish to use and display will return to “S-T”.
Press select buttons 1 & 2 to scroll to “S-E”.

S-E - Storage Enabled

This function is used to enable the storage setting to go in affect.
Press select button 1 and the current setting will be displayed (On or Off).
Press and hold select button 1 to toggle between “On” and “Off”.
Release the select button showing the setting you wish to use and display will return to “S-E”.

Press select buttons 1 & 2 to scroll to “Return”.

RTN - Return

Press select button 1 to return to “Refrigeration”.

Press & hold select buttons 1 & 2 simultaneously to move to the next item on the menu.

FREE - Free Vend

This function is used to set the Free vend option. Note; For free vend to become active a free vend switch must be connected to the controller on the free vend switch connector. Press select button 1 and “ENAB” will show on Display.

ENAB - Enable

This function is used to allow the free vend to go in to affect.
Press select button 1 and the current setting will be displayed (On or Off).
Press and hold select button 1 to toggle between “On” and “Off”.
Release the select button showing the setting you wish to use and display will return to “ENAB”.
Press select buttons 1 & 2 to scroll to “DSP”.

DSP - Display

This function is used to show the current number of free vends performed by the controller.
Press select button 1 and “#” will show on the display where “#” is the number of free vends performed by the controller. Release the select button and display will return to “DSP”.
Press select buttons 1 & 2 to scroll to “RSET”.

RSET - Reset

This function is used to reset number of free vends to zero.
Press and hold select button 1 for five seconds to reset the number of free vends performed by the controller to zero.
Release the select button and display will return to “RSET”.
Press select buttons 1 & 2 to scroll to “RTN”.

RTN - Return

Press select button 1 to return to “FREE”.
Press & hold select buttons 1 & 2 simultaneously to move to the next item on the menu.

OVER - Override

This function is used to allow a key switch to override some of the settings stored for normal operations.

PROGRAMMING

When enabled and the override switch is in the closed position, the controller will override "FREE", disable vending, disable currency acceptance, display will show "No Sales", and lights will be off. Vender will remain in this idle state until the override switch is in the open position.

Press select button 1 and the display will show the current setting for 2 seconds (On or Off).

Press and hold select button 1 to toggle between "On" - enabled and "Off" - disabled.

Release the select button showing the setting you wish to use and display will return to "OVER".

Press select buttons 1 & 2 to scroll to "SSM".

SSM - Sales Message

This function is used to turn on a scrolling message "Ice Cold Drink".

Press select button 1 and the display will show the current setting (On or Off).

Press and hold select button 1 to toggle between "On" and "Off".

Release the select button showing the setting you wish to use and display will return to "Sales Message".

Press select buttons 1 & 2 to scroll to "R-CH".

R-CH - Recharge

This function is used to enable the recharge card setting routine.

Press select button 1 and the display will show the current setting (On - recharge card enabled or Off - recharge card disabled). Press and hold select button 1 to toggle between "On" and "Off".

Release the select button showing the setting you wish to use and display will return to "R-CH".

Press select buttons 1 & 2 to scroll to "RTN".

RTN - Return

Press select button 1 to return to "User Menu".

Press & hold select buttons 1 & 2 simultaneously to move to the next item on the menu.

DIAG - Diagnostics

This function allows you to systematically diagnose problems related to the vender. To move to "AUTO" (Auto Test), press select buttons 1 & 2 simultaneously, to enter sub-menu press select button 1. The following are sub-menus of Diagnostics Menu: "SL" - Selection, "SP" - Sold Out Empty Test, "SW" - Sold Out Full Test, "MT" - Motors, "CM" - Coin mech, "NA" - Note Acceptor, "DSP" - Display, "RLY" - Relay, and "RTN" - Return.

SL - Selection

Press any select button, and the display will indicate the number of the select button pressed.

Press & hold select buttons 1 & 2 simultaneously to move to the next item on the menu.

SOE - Sold Out Empty Test

Use this to test the sold-out switches if the vender is empty. Press select button 1 to display any Sold Out Paddles that are not pressed, indicating that a column is empty. The display will automatically scroll through the columns that are sold out. Press select button 1 to return to "SP".

Press & hold select buttons 1 & 2 simultaneously to move to the next item on the menu.

SOF - Sold Out Full Test

Use this to test the sold-out switches if the vender is full. Press select button 1 to display any Sold Out Paddles that are pressed, indicating that the column is full. The display will scroll through the columns that have product. Press select button 1 to return to "SW".

Press & hold select buttons 1 & 2 simultaneously to move to the next item on the menu.

MT - Motors

Use this test to run any motor in the stack. Press select button 1 and "Motor 1" will show on the display. Use the following select buttons to run this test.

Press Select Buttons 1 & 2: Press until desired motor # to run or "Return" is shown on the display.

Press Select Button 1: Press to run the selected motor. The display will show "Vend" and the selected motor will run. Press select button 1 at "RTN" and display will show "MT"

Press & hold select buttons 1 & 2 simultaneously to move to the next item on the menu.

CM - Coin mech

PROGRAMMING

Use this test to check coin mech, coin chute work, and coin mech payout systems.

Insert coins. The value of coins will be reflected on display. Press select button 2 will exit the test and return any coins inserted and return to "CM".

Press & hold select buttons 1 & 2 simultaneously to move to the next item on the menu.

NA - Note Acceptor

Use this test to check note acceptor. Insert a bill. Bill will be held in escrow. Press select button 2 to stack the bill.

Press select button 3 to return the bill. After the note has been stacked or returned, the display will return to "NA".

Press & hold select buttons 1 & 2 simultaneously to move to the next item on the menu.

DSP - Display

Press select button 1 and the display segments will illuminate in a scrolling manner and return to "DSP".

Press & hold select buttons 1 & 2 simultaneously to move to the next item on the menu.

RLY – Relay: available only when Environmental Controls are set to on.

CMP# - Compressor #

This function allows you to test the relay electronic control of the compressor.

CAUTION: Disconnect power to the compressor before testing the compressor relay. Failure to disconnect power to the compressor before testing the relay could result in damaging the compressor.

Press select button 1 and the display will show "CMP #". Press select button 1 to toggle the state of the relay.

Press select buttons 1 & 2 to scroll to "FAN #".

FAN# - Fan #

This function allows you to test the relay electronic control of the evaporator fan.

Press select button 1 and the display will show "FAN #". Press select button 1 to toggle the state of the relay.

Press select buttons 1 & 2 to scroll to "LT #".

LT# - Light #

This function allows you to test the relay electronic control of the lights.

Press select button 1 and the display will show "LT#". Press select button 1 to toggle the state of the relay.

Press select buttons 1 & 2 to scroll to "RTN".

RTN - Return

Press select button 1 to return to "RLY".

Press & hold select buttons 1 & 2 simultaneously to move to the next item on the menu

RTN - Return

Press & hold select button 1 to return to "Diagnostics".

Press & hold select buttons 1 & 2 simultaneously to move to the next item on the menu.

AUTO - Auto Test

This function is used in Dixie-Narco's manufacturing process and is not intended for use in the field. Its purpose is a self-test routine to check the SBC components listed. For further details contact Dixie-Narco Factory Service.

RTN - Return

Press & hold select button 1 to return to normal operating mode.

A. Press and hold select buttons 1 & 2 simultaneously to move through the menu from top to bottom.

B. Press select button 1 to move left/right or enter/exit in the menu, depending on the menu prompt on the display.

PROGRAMMING

Setting The Vender Type

When installing a service control board that has not been installed in a vender, the control board needs to set the vender type to recognize and perform proper space-to-sales options and vending operations.

To set the vender type:

1. Remove power to the vender.
2. Remove the existing control board.
3. Install the new control board.
4. Power-up the vender and the display will scroll "Set Model Number".
5. Press button 1 and the machine will display the model number available "DN501E-10".
6. Press buttons 1 and 2 simultaneously, this will allow the user to cycle through the available model numbers for that machine type (see list below). Once the desired model number is displayed "DN501E-9" or "DN600E-9", pressing button 1 will set this type.

Note: If the incorrect model number is set, the machine will not have the correct default space-to-sales arrangement. The user should power up the unit with the door open and press button 1 when the Model Number is displayed. The display will show "Set Model Number". Follow steps 5 and 6 above. Only the Model Numbers that correspond to the number of columns in the machine will show. See list:

GENERAL MAINTENANCE

The most important facets of proper vender care and maintenance are the electrical power supplied to it, leveling, and cleanliness of the machine and its components.

POWER

The vender must be connected to a dedicated 120VAC, 15 Amp circuit (U.S. and Canada).

CAUTION:

REMOVE POWER TO THE VENDER PRIOR TO CONNECTING / DISCONNECTING ANY ELECTRICAL COMPONENTS FOR TESTING OR REPLACEMENT.

CLEANING

DO NOT USE A WATER JET OR NOZZLE TO CLEAN THE VENDER

SIGN FACE

The polycarbonate sign face requires proper cleaning to prolong its service life. Periodically clean the sign as follows:

1. Rinse the sign with a soft cloth or sponge soaked in warm water.
2. If necessary, use a mild soap to loosen any dirt or grime. DO NOT SCRUB or use a brush or squeegee. Scrubbing may cause damage to signs with a clear ultraviolet resistant coating (prevents yellowing).
3. Repeat the above steps as necessary. To prevent spotting, dry the sign using a soft cloth.

CABINET

1. Wash the cabinet with a good detergent or soap mixed with warm water.
2. Wax the vender often with a good grade of automobile wax.
3. Any corrosion inside of the vender should be removed with a fine steel wool and the area should be painted with aluminum paint.
4. Repair any scratches on painted surfaces to prevent corrosion.

THE COMPRESSOR ELECTRICAL CIRCUIT IS ALWAYS LIVE WHEN THE PLUG IS CONNECTED TO AN ELECTRICAL OUTLET

REFRIGERATION CONDENSER

- Check the condenser periodically for dirt or lint build-up.
- Remove build-up with a brush or vacuum, or blow the dirt out of the condenser with compressed air and an approved safety nozzle.
- Ensure nothing obstructs the air intake at the bottom of the main door.
- Ensure nothing obstructs the air exhaust at the rear of the cabinet.

COIN ACCEPTOR

- Follow the coin acceptor manufacturer's cleaning instructions.

LUBRICATING THE VENDER

Time	Component	Lubricant Example
Every 6 months (or as needed)	Main Door	
	1. Lock Bolt & Nut Retainer 2. Hinge Pivot Points	Mechanics Friend Mechanics Friend
Every Year (or as needed)	Inner Door	
	1. Hinge Pivot Points Inner Door 1. Door Gasket	Mechanics Friend Petroleum Jelly

Single Board Controller (SBC) Software Update Procedure

This document describes how to update software on the Single Board Controller (SBC). **Note:** All existing software revisions, except software version 804,919,240.11, will automatically update the software revision upon installation. For SBC boards using 804,919,240.11 software menu programming is required to manually update the software. **Note:** All Dr Pepper SL5 Venders require software version 804,919,240.61 or higher.

Important: EPROM's containing software is sensitive to Electrostatic Discharge (ESD). Failure to handle the EPROM carefully could cause damage, which may result in a failed Single Board Controller (SBC).

ALWAYS KEEP THE EPROM IN THE ESD TUBE. GROUND YOURSELF ON THE VENDER CABINET BEFORE REMOVING THE EPROM FROM THE ESD TUBE OR CONTROL BOARD. AN EPROM CAN BE USED TO PROGRAM MANY VENDERS, AS LONG AS CARE IS TAKEN NOT TO DAMMAGE THE EPROMS LEGS.

ALWAYS TURN POWER OFF BEFORE REMOVING OR INSTALLING EPROMS IN THE CONTROL BOARD.

Important Notes: Use the SBC programming manual to program a vender that has a Single Board Controller (SBC) installed. Resetting the machine's model number is required when updating the space to sales default for Dr Pepper SL5 DN501E-10 machines only (software revisions 804,919,240.41C, 804,919,240.51 and higher). The model number reset will make the new space to sales default settings operational. The procedure to reset the model number is provided in section IV.

I. EPROM removal

- Power down the Vender. **Ground yourself on the vender cabinet before removing the EPROM from the ESD tube or control board.**
- If the EPROM is present in the SBC, remove the existing EPROM from the SBC.
 - **Note:** An EPROM does not need to be in the board after the SBC has been programmed. The EPROM can be used to reprogram other boards.
- Verify the pins of the new EPROM are not bent before installing in the EPROM socket.
- Install the new EPROM in the EPROM socket. Ensure the EPROM is oriented correctly with its reference marker (locator) in the same direction as the reference marker (locator) of the EPROM socket. Do not rely on the EPROM label for orientating the EPROM. See Figure 1.

II. Automatic Reprogramming (all software revisions **except** 804,919,240.11)

- Turn power on to Vender. When auto-updating, the display will remain blank while the red LED on the board blinks rapidly for 3-4 seconds. Verify the new software version is shown on the display. If the new software version (the software version of the newly installed EPROM) displays, the SBC software has been successfully updated. If not, verify the EPROM is seated properly, with the reference marker oriented correctly and follow instructions for manual update if updating from 804,919,240.11. If problems still exist, contact the Dixie-Narco Technical Service Department.

PROGRAMMING

Note: To remove the EPROM after programming is complete turn power off, **ground yourself on the vender cabinet before removing the EPROM**, remove the EPROM, turn power on, test vender for proper operation.

III. Manual Reprogramming (all 804,919,240.11 or if an EPROM does not automatically reprogram the SBC)

- At power up, the current software version will be displayed. To manually program the control board with the new software, press the blue service switch on the SBC to enter the service menu. Advance to the “Auto Test” menu by holding buttons 1 & 2 simultaneously. Enter Auto Test by pressing button 1, and advance to the “Reprogramming Microprocessor” submenu by holding buttons 1 & 2 simultaneously.
- At the “Reprogramming Microprocessor” prompt, press button 1. “THIS OPERATION REPROGRAMS VENDOR” shows on the display. Press button 1 at this prompt. Next display will show “BUTTON 2 = REPROGRAM, BUTTON 3 = EXIT”.
- Press button 2 to reprogram vender with the new software. “Reprogramming Vendor...” displays while the red LED on the board blinks rapidly for 3-4 seconds. Verify the new software version, and previous settings return to the display. If the new software version (the software version of the newly installed EPROM) shows on the display, the SBC software has been successfully updated.

Note: To remove the EPROM after programming is complete, remove power to the vender, **ground yourself on the vender cabinet before removing the EPROM**, remove the EPROM, while still grounded install a label on the microprocessor showing the revision of software that is installed in the SBC, power the vender back on and test for proper operation.

Figure 1

IV. Dr Pepper SL5 DN501E-10 machines model number resetting to update the space to sales (software revisions 804,919,240.41C, 804,919,240.51 and higher). This is needed due to number 1 and number 2 select buttons flavor specifications being permanent.

- The software revisions listed must be updated in the machine through either step II or III before the new space to sales changes will work.
- After the new software is updated, make sure the vending machine’s door is open.
- Remove power to the machine, by unplugging it from the outlet or at the stack plug..
- Reapply power to the machine.
- At power up the current software version and model number will scroll across display.
- After the current model number is displayed, press select button 1. Then display will show “MODL” for set model number.

PROGRAMMING

- Release and press select button 1 to enter the set model number menu. The current model number will display. Note: this will say 501E-10. Press and hold select buttons 1 and 2 simultaneously to scroll through the available model numbers and back to 501E-10. Release when the model number you wish to use is displayed (501E-10).
- Display will show model number selected (501E-10). Press select button 1 to lock in the setting. After the model number is successfully reprogrammed, the new space to sales settings will be operational.
