

The **NARCO** Executive III Stylestar & Executive IV Stylestar Pre-mix Venders

APPROVED STYLESTAR CABINET STYLING
WITH NEW SELECTOR PANEL PLUS OTHER
IMPORTANT IMPROVEMENTS

Narco's newly designed Executive Pre-Mix Cabinets make the route man's job much easier than ever before when servicing the venders. Narco has added a larger Stylestar illuminated sign, a new stainless steel selector panel (instead of aluminum) and new, larger product identification selector buttons. The Executive Cabinets are wider for easier servicing and all components in front of the product storage area swing out of the way to give the route man free access to the product containers.

The door trim on the all-new Executive Pre-Mix Line is constructed of reliable aluminum extrusions which are polished and anodized.

The Executive Line cabinets (III and IV) are taller (79"). They are available in beige for bank installations and do not require top filler piece.

PLUS THESE ADDITIONAL BOTTLER REQUESTED FEATURES

- Has capacity of 13 product tanks, 11 at floor level, 2 on easy-access shelf.
- Greater cup capacity (on 7, 9 and 10 ounce) than ever before.
- Relay Box located on righthand upper wall of cabinet for easy servicing.
- CO₂ cylinder shelf up front providing easy loading, easy access to regulators.
