Issue 106

November 30, 1998

The color of the drive cam on all “Snack” motors (P/N 1577035) has been changed from white to blue. The cam on the “Food Module” motor (P/N 4744555) will remain white. Our motor supplier made this change as an identification tool in their assembly process.

The location of the switch mount has been changed on the blue cam “Snack” motor to provide a better switch actuation.
