Issue 113

March 10, 1999

Production Software to support Main Controller Assembly Crane #9989756 Kit-Replacement Controller-New or #9989755 PCB Assembly-Main Controller only

Recently, changes were made to the main controller on *P.I.E.-based equipment, which require a new EPROM for proper operation.

If an old main controller (#9989678) is to be replaced with either main controller (#9989756 or #9989755), the EPROM might need to be updated according to the chart below. Any EPROM versions prior to these will not work properly on the above mentioned main controllers.

The newer software is compatible with older boards. If a customer just wants to update the software, they can.

Machine Type	EPROM Part No.	Version	Date	Note
*GPL Snacks P.I.E.	1606003	160.03	9/15/98	Snack-based equipment with green display
GPL Coffee	6306005	630.05	9/21/98	all GPL coffee machines

* Equipment can be identified by a green digital display
