RE: Evaporator Fan Assembly Retrofit Kit

Reason: New Evaporator Fan developed to replace Original Component without the use of a choke.

Order: 62604360 CGFV Evaporator Fan Retro Fit Kit, Domestic only

Description	62604360 CGFV Evaporator Fan Retro Fit Kit, Domestic only	QTY
Evap Fan Assy.	CR0021837	1
Screw, #8-32	80030438	3
Perma-Gum Sealer, White	80360113	.06250 lb.
Installation Instructions	M131.x	1

Tools Required:
Phillips Head Screwdriver

Evaporator Fan Kit Installation:

1. Remove power to the Vender.
2. Remove the Refrigeration System from the Vender.
3. Remove existing Evaporator Fan Assy and harness.
4. Place the Evaporator fan assembly CR0021837 in the evaporator shroud. Make sure the edge of the shroud and the straight edge of the fan assembly are parallel.

SERVICE INFORMATION

5. Turn the Evaporator Fan Assembly so the holes in it line up with the holes in Evap Shroud.
6. Attach the Evaporator Fan Assembly to the evaporator shroud with the 3 screws (80030438) using the Phillips head screwdriver.
7. Thread the Evaporator Fan Harness through the hole in the Evaporator Drain Pan front as shown and plug the hole with white perma-gum 80360113.
8. Install the deck in the machine, secure, plug in, and test for proper operation.
