

Cold Drink MDM SL45

Cold Drink MDM SL45

A Clear Choice

The Model MDM SL45X is a cold cup drink machine that offers your customers 15 different thirst quenchers—10 syrup flavors, one seltzer water, one filtered water and three ice tea selections, including diet tea, regular black tea and regular sweetened tea.

Plus, it beats other venders cold with a constant supply of crystal clear ice and a button that lets customers select extra ice or no ice at all.

Superior Technology

Several advanced design features have been incorporated into the MDM SL45X.

A unique "dual volume cup" option lets the machine vend cold beverages in two sizes—any combination of the increasingly popular 18-ounce cups, 12-ounce cups or 9-ounce cups. And the choice should help increase sales.

The special "multi-pricing" feature that allows up to four different prices at one time lets you take full advantage of the dual volume cup option and the maximum versatility of 15 item selectivity.

The MDM SL45X provides the best mixing system available in a cup vender. This is accomplished via a patented soda mixing nozzle which produces the best brixed drinks in the industry. The reason for the best brix: water and syrup are injected together into the nozzle and mixed there instead of in the cup.

Another option of the MDM SL45X is our new dollar bill acceptance feature, which makes sure you'll never lose a sale because a customer is without change. This feature utilizes currently available bill validators without circuit board changes.

Customer Convenience

Large selection labels attract customers and enhance product appeal, identifying at a glance the wide selection of products your machine offers.

Illuminated "Temporarily Out Of Service" light avoids customer inconvenience.

Easily Maintained

The MDM 45 Series is designed for easy location maintenance. A full 2 year warranty helps keep maintenance costs low.

A removable stainless steel cup station reduces cleaning and servicing time.

An optional door kit—either single or two-handed delivery door operation—provides comfortable performance.

The MDM SL45X provides a wide access to the compressor compartment and can be serviced from the front.

A pop-in/pop-out billboard display allows fast change-overs for your advertising convenience.

MDM SL45X Specifications
