

THE NARCO R-3 AND R-4

NARCO R-3

*electric
pre-mix units*

NARCO MODEL CPDV-C4 INSTALLED

NARCO R-4

From Narco® comes the exciting new R-3 and R-4 remote under-counter units with optional adjustable stand. Permits placement of top of unit directly beneath a counter top for **minimum length** of exposed valve lines.

The Narco R-3 (three product) and the R-4 (four products or three products plus carbonated water) offer greatly improved casual drink performance with these Narco-New features:

- Using adjustable stand, the units may be raised in one inch steps from 35" to 48". Fits directly beneath counter. Shortens lines to counter top dispenser.
- Outlet line fittings for counter dispenser valve lines are in cooled insulated pocket at top edge of units to give minimum length of line exposure going to the dispenser.
- Both units are built with "foamed-in-place" polyurethane insulation. This most efficient insulation gives a tight bond and permanent seal between inner and outer shell.
- Prices are **lower** than predecessor models!

Choose the R-3 and R-4. The electric pre-mix under-counter units from Narco with a truly different design for improved performance.

CPDV-C3

NARCO Model CPDV-C3

Modern styling in durable plastic and stainless steel adds modern freshness to these NARCO® remote counter dispensers. Available with three or four valves. Valves mounted on stainless steel plate, free of plastic housing. Rugged strength with design permitting easy cleaning, heavy duty cast drain pan threaded for connection to permanent drain hose. Easily removable stainless drip tray rests in drain pan. Available with either manual or self-closing Cornelius valves. Illumination by fluorescent light attracts customer attention. Only 4" x 17" of counter space required. Quickly attached with thumb screws.

R-3 AND R-4 ELECTRIC PRE-MIX UNITS

With Optional Adjustable Stand

SPECIFICATIONS

Adjustable Stand for use with R-3 and R-4.

This adjustable stand with leveling legs allows the R-3 or R-4 pre-mix units to be raised in one inch increments so that the top of the unit may be placed directly beneath the counter, thus further shortening the lines to counter top dispenser. With a height range of 35" to 48", the adjustable stand makes it possible to minimize the length of valve lines, which results in faster draw rate and better control of foaming on casual drink.

- Outlet line fittings and valve line connections are enclosed in insulated, refrigerated panel.
- Heavy duty handles are standard equipment for easier handling.
- Leveling legs are standard equipment. Roller casters are optional.
- Polyurethane "foamed-in-place" insulation results in a tight bond and permanent seal between inner and outer shell. Also this insulation contributes to the structural rigidity of the unit.

Narco Model R-3 — Three Products

Narco Model R-4 — Four products or may be used for three products plus carbonated water.

Outside Dimensions

Model	Width	Depth	Height	Compressor	Approx. Ship Wt.
R-3	13½	14	30¾	1/5 HP	168 Lbs.
