

THE NARCO R-4

Electric Pre-Mix Unit With Optional Adjustable Stand

The NARCO® R-4 (four products or three products plus carbonated water) offers outstanding casual drink performance with these special NARCO features:

- Using adjustable stand, the R-4 may be raised in one inch steps from 35" to 48". Fits directly beneath counter. Shortens lines to counter top dispenser which results in faster draw rate and better control of foaming on casual drink.
- Outlet line fittings for counter dispenser valve lines are in cooled insulated pocket at top edge of unit to give minimum length of line exposure going to the dispenser.
- Constructed with "foamed-in-place" polyurethane insulation. This efficient insulation gives a tight bond and permanent seal between inner and outer shell. This insulation also contributes to the structural rigidity of the unit.
- Heavy duty handles are standard equipment for easier handling.
- Leveling legs are standard equipment. Roller casters are optional.

OUTSIDE DIMENSIONS

Model	Compressor	Approx. Ship. Wt.	Width	Depth	Height
R-4	1/5 H.P.	172 Lbs.	13½	14	30¼

Choose the R-4. The electric pre-mix under-counter unit from Narco with a truly different design for improved performance.
