

The NARCO SUPER MARK IV "C" and SUPER MARK III "C" Pre-Mix Venders Are New From Every Angle!

NEW SELECTOR PANEL

Observe the all-new Selector Panel designed of etched aluminum with the attractive Narco trademark in the lower right corner. The Coin Insert and Instruction Area, with handsome bull's eye styling, is made from tough, molded plastic, backed by the metal panel. Longlife, Neon-Glo lamps are used in the Soldout Lights located above each pushbutton. The Narco-new, functional Selector Panel also features molded plastic pushbuttons with attention-getting identification signs. The button on the extreme left of the panel is for Coca-Cola. Experience has shown this to be a preferential position which sells more Coca-Cola for the bottler. In addition there are 3 other product pushbuttons, one of which may also be used for Coca-Cola.

The new Super Mark "C" series also features a newly-designed, heavier-duty, anodized aluminum cup-station door, with a sure-seal gasket and a new spring-type hinge.

EASILY CONVERTS WITH OPTIONAL KIT

The Super Mark III "C" may easily be converted to a Super Mark IV "C" with the use of a simple, optional Conversion Kit.

"Coca-Cola" and "Coke" are the registered trade-marks which identify only the product of The Coca-Cola Company

Approved under the conditions specified in the foreword of this catalog
