The Mini-Giant

NARCO AUTOMATIC

SERPENTINE CAN VENDER 354-6

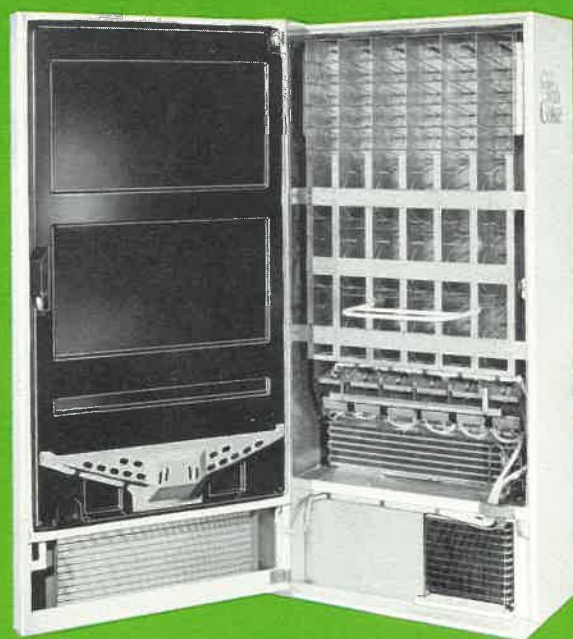

Using serpentine tracks with co-related parallel ramps, Narco has taken the giant step in compact can vending with maximum can-vend yield. The Serpentine 354-6 vends more cans per cubic foot of vender space than any other in its class.

Complete Stylestar styling, including Stylestar sign, anodized aluminum trim, extra-large product selection bars and wood grained panel, gives you the most elegant can vender available today.

To the built-in case loading platform for easier and faster loading, 6-product vend and instant product release, Narco's Serpentine 354-6 adds these new design features:

- New, long-life Neon Sold Out Lamps to eliminate frequent replacement.
- Door-mounted Kydex can chute for easy servicing.
- Door wiring harness connection—securely fastened to cabinet eliminating unwanted disconnects.
- New, Acrylic enamel for greater resistance to corrosion, humidity and marring.

When it comes to can vending, you get more sales per square foot from the Serpentine 354-6 Can Vender . . . the Mini-Giant from Narco!
