

The Narco HR-5 5-Product Remote Pre-Mix Cooling Unit

The HR-5 is a 5 product remote pre-mix cooling unit which can be used with the Narco Bar Valve for 5 products or any standard draw head for 4 or 5 products. (For 4 products, a small jumper is furnished to connect together circuits 4 and 5.) Basically, the new HR-5 features the same components as the famous Narco R-4 with a newly designed arrangement for the ultimate in compactness.

FEATURES:

- All steel construction, bonderized, epoxy primed and finished in white high-bake enamel.
- No product fittings in refrigeration area.
- Surprisingly Compact—Unit is only 17" high without sacrificing cooling capacity or ease of service and maintenance.
- Front Outlet fittings—The outlet fittings and lines protected in convenient under-lid location.
- Refrigeration—Narco "Aluminum Shavings type," Sealed water bath, no agitator motor.
- Drip-proof Louvres and Lid are removable without use of tools.
- Insulation—High Efficiency foamed-in-place polyurethane.
- Capacity—200 drink capacity at 90° inlet with draw rate 4 drinks per minute.

(See Reverse Side for Bar Valve Information)
