

"L" Gasket - Cabinet Vandal Panel Left Side

M020.0

ORDER: 903,600,53x.x1 "L" Gasket 72"

Note: When shipped this gasket is "U" shaped. Note on the adhesive side the tape and paper are two separate pieces. You will need to tear or cut this the length of the gasket to create two pieces of "L" gasket. See figure 2.

INSTALLATION INSTRUCTIONS:

1. Ensure the surface of the cabinet vandal panel left side is free of any lubricants or dirt that may affect the gasket sticking to the panel.
2. Hold the "L" gasket vertically with the adhesive side to the left as shown in figure 1.
3. Peel the paper backing from the adhesive side down around 6".
4. Start the top edge of the vandal panel where the panel and front edge of the breaker strip meet.
5. Stick the adhesive side (A) of the "L" gasket to the vandal panel so that the non-adhesive side (B) overlaps the breaker strip. See figure 3.
6. Carefully peel the paper backing from the "L" gasket and press the gasket firmly to the vandal panel, working all the way down the length of the vandal panel. See figure 3.
