DIXIE-MARCO, INC.
SERVICE BULLETIN #127

Date: 6/18/71

MODEL: Executive - Pre-Mix Vender with Ice.

SUBJECT: Water Drip Diverter for Cup Station.

REASON: To route water into the Cup Station and prevent water from accumulating on cabinet floor.

- ORDER AS:
- a. 1 A120,010,050.03 Drip Diverter
 - b. 1 900,901,630.02 Threaded Rod

- DO THIS:
- a. Remove middle spacer and bolt from between cup chute halves.
 - b. Install diverter in the spaced area between the cup chute halves of the Executive and insert rod (from spacer) through cup chute and diverter.
 - c. Pointed (angled) end hangs down.
 - d. The existing rod in the diverter remains as is but lays back of the cup station so diverter cannot be pulled forward and interfere with cup dropping.
