| <u>MODELS</u> | <u>BEGINNING SERIAL NUMBERS</u> | <u>APPROXIMATE DATE OF MANUFACTURE</u> |
|---------------|---------------------------------|--|
| CFT-54        | 1750055                         | 3/26/73                                |
| CFT-34        | 1779125                         | 4/23/73                                |
| CFT-28S       | 1787001                         | 5/18/73                                |
| CFT-20S       | 1793075                         | 6/15/73                                |
| CFT-45        | 1798075                         | 7/25/73                                |
| CFT-37S       | Unknown at this time            | Unknown at this time                   |

SUBJECT: Packaging - Exterior and Interior

REASON: To provide a stronger and more durable cartoned package.

IDENTIFICATION: The new package can be identified quickly by looking at the top of the Carton.

The top flap will extend approximately 20" (overlap) from either the front of the cooler or the rear of the cooler.

About the only time you will be called upon to observe Packaging is when damage has occurred.
