Service Bulletin

256

Date: ~~August 17, 1983~~
Revised: August 22, 1983

MODELS: DN Dual Adaptables
DN CB Dual Adaptables - Not 1 1/4" Deeper

SUBJECT: Replacement Stack - 1 1/4" Deeper

REASON: To provide the latest stack as a replacement.

- 1a. When a replacement stack assembly is ordered for models listed hereon, a 1 1/4" deeper stack will be furnished.
- b. This stack will be set for 12 oz cans and will contain the following:

- 1 Rear Spacer - per standard column
- 1 Rear Spacer - per narrow column
- 2 Shims - per standard column
- 1 Shim - left side - per narrow column
- 1 Oscillator - per standard column
- 1 vend rotor - per narrow column
- 1 Sold out bar
- 1 Cover Vend Motor

TO INSTALL:
DO THIS

- 1a. Remove old stack.
- b. Remove air deflector from rear wall.
- c. Remove can/bottle chute.
- d. Slide new (1 1/4") stack into position - push stack all the way to the rear.
- e. Check front stack supports - left and right. If they do not support stack completely, "tap" them forward with a hammer.
- f. Check to see if the bolt holes at rear of stack are aligned with holes in rear wall of cabinet.
If not, drill and tap new holes, size 1/4"-20.
- g. Check to see if the bolt holes at top front of stack are aligned with holes in top of cabinet.
If not, drill and tap new holes, size 1/4"-20.
